About Us

2021

Founded with one deeply felt purpose

Fabby was born from a moment of reckoning.

In the aftermath of COVID-19, we witnessed patients in palliative care and families stretched thin, doing their best with whatever they could find. The gap between what people needed and what they could afford was painfully clear. We knew we had to act.

So in 2021, Fabby was founded with one deeply felt purpose: to make genuinely high-quality hygiene and healthcare products available to every household, without making families choose between quality and affordability.

> *"Care is not a luxury. It is dignity."*

What We Offer

Our range of premium adult diapers, highly absorbent underpads, gentle baby wipes and personal hygiene essentials is thoughtfully developed for infants, adults, caregivers and healthcare professionals.

Every Fabby product is made with skin-friendly materials, breathable fabrics and advanced absorbency technology to ensure dryness, rash protection and long-lasting comfort, whether at home, in hospitals or while travelling.

Our Journey

Over four years, Fabby has grown from a single conviction into a brand trusted across Maharashtra, Gujarat, Karnataka, Kerala, Andhra Pradesh and beyond.

Maharashtra · Gujarat · Karnataka · Kerala · Andhra Pradesh · & beyond

But our measure of success has never been geography. It is the caregiver who sleeps a little easier, the patient who feels a little more comfortable, the family that feels a little less burdened.

Better Care. ***Better Comfort.*** ***Better Living.***

We continue to listen, improve and innovate, because the people who trust us deserve nothing less. When you choose Fabby, you choose confidence, security and care that truly understands you.

OUR PROMISE TO YOU

Because every moment of care *matters.*

There are moments in life that ask the most of us: moments when we care for a parent who once carried us, a child just beginning to find their way, or someone we love through the quiet indignities of illness and age. In those moments, the smallest of gestures become acts of love. A gentle wipe. A dry, comfortable night. The dignity of feeling clean and cared for.

At Fabby, we understand that the products we make are not just hygiene solutions. They are a promise.

A promise to the mother whose hands tremble as she tends to her ageing father. A promise to the nurse who gives her very best at 3 in the morning. A promise to the baby who knows nothing yet except the warmth of being held and the comfort of being cared for.

Our products are crafted with one guiding thought: that every person, at every stage of life, deserves to feel safe, dignified and loved.

> *We make the products. You provide the love. Together, we make it easier.*

The smallest things become the most profound acts of love.
